E-Mail Address for System Notifications

Important information for connecting AutoDNS through a third party:

No charges apply for the provision or use of the selected functions.

These additional services are carried out free of charge.

It should be noted, however, that costs may be incurred for the use of external software or third-party licenses.

InterNetX does not guarantee that all functions made available through AutoDNS are also available for users of external implementations.

InterNetX will provide no support for external implementations.

InterNetX does not guarantee an error-free processing of domain actions carried out via external implementations of the AutoDNS interface.

ACTIVATION OF AUTODNS ACCOUNT FOR
EXTERNAL API IMPLEMENTATION

InterNetX provides a centralized whois service to simplify whois queries, the WhoisProxy. The WhoisProxy effectively is an intermediary service and accesses the respective whois servers of the registry, thus eliminating the need to poll the various whois servers for different TLDs.

If you currently do not use a WhoisProxy, you can request the free "Standard" version of the InterNetX WhoisProxy below. Packages with larger query quotas can be booked at the according prices.

WHOISPROXY:

		one-time fee	monthly
☐ Standard	(up to 500 enquiries/month)	0,- €	0,- €
☐ Business	(up to 5.000 enquiries/month)	19,- €	69,- €
☐ Pro	(up to 10.000 enquiries/month)	19,- €	99,- €
☐ ISP	(up to 100.000 enquiries/month)	19,- €	499,- €

Notification to the email address _____ if _____% of the selected number of Whois enquiries is exceeded.

Please enter a fixed IP address for the use of WhoisProxy: _____.

Terms of use for Whois domain name queries:

The user hereby assures that he will use data received via the WhoisProxy exclusively for technical and administrative purposes or to resolve legal matters. The same applies to all data which the user has received in order to contact the domain owner. The user has to guarantee that a legitimate interest is existent and that the terms of use for the respective registries within the Whois query are completely acknowledged and accepted by him.

The user will compensate to InterNetX all damages made and will completely indemnify and hold the InterNetX GmbH free and harmless from any claims, other vitiations and liabilities that are related to the illegitimate utilization of the Whois query. This specifically applies to cases where the aforementioned provisions are not followed.

In case of disregarding this warranty or abusing data which has been provided to you through the Whois query, InterNetX reserves the right to cancel this service for you without any advance notice. Furthermore InterNetX GmbH reserves the right of asserting further claims.

InterNetX reserves the right to block i.e. limit IP addresses - not only temporarily - in order to protect the infrastructure of InterNetX against any threat. Due to differing regulations of the allocating authorities, the customer is not entitled to use his/her Whois enquiries for all TLDs and any time period to the full.

Upon receiving this data, your AutoDNS account will be enabled for the desired external implementations of the AutoDNS interface.
We will send you detailed information in the form of Quick Guides.

If you have questions, our experts from the InterNetX sales team will be happy to assist you: **sales@internetx.com**

All prices exclude VAT. This information is subject to errors and price changes. Furthermore, the general terms of InterNetX GmbH and special conditions of each relevant business unit of the InterNetX GmbH apply (available at http://www.internetx.com or by post at request).
